
AUSTEK - PRODUCT INFORMATION SHEET

MULTI FRESH (Super Concentrated Sanitizer & Disinfectant)

Multi Fresh is a fast acting powerful surface sanitizer. The high viscosity and super concentration means that it rapidly removes the thickest of rust stains, mildew, soap scum, grime and germs.

Multi Fresh contains specially formulated anti-bacterial and disinfectant properties, which means that all surfaces are left germ free. The advanced surfactants used in **Multi Fresh** make it incredibly effective on all bathroom surfaces at the same time it contains no abrasives, harsh acids or bleach.

How to use

Method's

Multi Fresh should be applied to the surface manually by a bucket and cloth or by hand spray. For a vertical surface we recommend using the foaming trigger. Once applied leave for at least 30 seconds to 10 minutes depending on the surface and toughness of deposits. Difficult stains should be agitated with a brush or mop. Apply regularly for continued freshness.

Concentrations

Dilute the super concentrate (neat product) to 10:1 (e.g. 100ml **Multi Fresh** to 1000ml water) to obtain standard strength **Multi Fresh**

Then re-dilute this solution up to 50:1 according to the degree of soiling.

In general the recommended dilution rates are:

Light cleaning 50:1 (i.e. 500:1)

Medium cleaning 20:1 (i.e. 200:1)

Heavy cleaning 5:1 (i.e. 50:1)

Typical applications

Multi Fresh is recommended for use in all types of bathrooms and sanitary installations; drains, washroom basins, chrome, ceramic tiles, sinks, showers, shower doors and baths, including porcelain and fibreglass. Spot test in an inconspicuous area.

Health & Safety

See separate "SAFETY DATA SHEET" for information.
