
AUSTEK - PRODUCT INFORMATION SHEET

MULTI TRANZ (Super Concentrated Vehicle Cleaner)

Multi Tranz is a red coloured, highly concentrated powerful detergent cleaner designed for the rapid removal of heavy road dirt, grease and general soiling from all types of vehicles and machinery.

Multi Tranz is fully biodegradable so after use it is broken down into harmless materials by normal water treatment and natural processes. It is non-toxic and non-flammable.

How to use

Methods

Multi Tranz is high foaming and so is specially formulated for use via a pressure washer. The area cleaned should be rinsed with clean water through the washer. **Multi Tranz** is also a highly effective vehicle cleaner when used manually. Manual use can be either through a simple cloth and bucket application in which case rinsing afterwards is recommended.

Concentrations

Dilute the super concentrate (neat product) to 10:1 (e.g. 100ml **Multi Tranz** to 1000ml water) to obtain standard strength **Multi Tranz**.

Then re-dilute this solution up to 50:1 according to the degree of soiling.

In general the recommended dilution rates are:

Light cleaning 50:1 (i.e. 500: 1)

Medium cleaning 20:1 (i.e. 200: 1)

Heavy cleaning 5:1 (i.e. 50:1)

Typical applications

Multi Tranz is so versatile that is ideally suited to use both inside and outside of vehicles, making it a particularly cost effective product to use in the overall maintenance of vehicles. E.g. interiors, vinyl, upholstery, windows, paintwork, chassis and engine.

Multi Tranz has bacteriostatic qualities making it an ideal product for cleaning the inside of food carrying and refrigeration vehicles.

Health & Safety

See separate "SAFETY DATA SHEET" for information.
